---

*Celebrating 17 Years* of Engineering Design and Technology In-Service Programs that  
Develop Technological Literacy at Grades K-5

---

## **Don't Miss the Chance to**

Reinforce the Virginia Standards of Learning through hands-on designing, building, and problem solving activities.

Explore strategies for integrating Children's Engineering into the existing curriculum.

Attend workshops conducted by experienced K-5 classroom teachers.

Network with teachers who share your interest in the need for every child to study and use technology.

Visit educational exhibits and examine available materials from technology vendors.

## **Learn How Children's Engineering Promotes**
