Geometric Creatures

Background: We have been learning about geometric shapes, such as squares, triangles, rectangles, circles, cubes, rectangular solids, spheres, pyramids, cones, and cylinders.

Design Challenge: Design and build an imaginary geometric creature using both plane and solid geometric shapes. Your geometric creature must stand by itself and have at least two moving parts.

Criteria:
Your creature must
- have at least five plane shapes
- have at least three solid shapes
- have two moving parts (use levers, pneumatics, and/or pulleys)
- stand by itself
- be attractive.

Materials: You may select from the items below.
- rulers
- construction paper
- brads
- poster board
- craft sticks
- cardboard cylinders
- glue
- straws
- tag board
- plastic tubing
- empty containers
- 12 inches of string or yarn
- spools
- paint
- general art supplies
- syringes
- 12 inches of tape
- balloons

Targeted Standard of Learning: Mathematics 3.18
Supporting Standards of Learning: Mathematics 3.14, Science 3.1, 3.2, English 3.1, 3.2, 3.4
Geometric Creatures

Targeted Standard of Learning: Mathematics 3.18
- The student will analyze two-dimensional (plane) and three-dimensional (solid) geometric figures (circle, square, rectangle, triangle, cube, rectangular solid [prism], square pyramid, sphere, cone, and cylinder) and identify relevant properties, including the number of corners, square corners, edges, and the number and shape of faces, using concrete models.

Targeted Standard for Technological Literacy: Standard 9
- Students will develop an understanding of engineering design.

Tips for Teachers

Class Management
- Small groups
- Each student keeps own Guided Portfolio.

Materials Provided
- Design Brief
- Guided Portfolio
- Rubric Assessments

Time Management
- Session 1: Introducing Design Brief and Portfolio (45 min.)
- Session 2: Building (60 min.)
- Session 3: Building (45 min.)
- Session 4: Sharing and evaluating (45 min.)
Geometric Creatures

__________________________________  ________________________  ________________________

1. What is the problem? State the problem in your own words.

_____________________________________________________________________________

_____________________________________________________________________________

_____________________________________________________________________________

_____________________________________________________________________________

Targeted Standard of Learning: Mathematics 3.18
Supporting Standards of Learning: Mathematics 3.14, Science 3.1, 3.2, English 3.1, 3.2, 3.4

Targeted Standard for Technological Literacy: 9
Supporting Standards for Technological Literacy: 8, 10, 11
2. **Brainstorm solutions.**
Draw or describe some possible solutions.
Guided Portfolio—3
Name __________________________

3. Create the solution you think is best.
Keep notes below about the problems you have and how you solve them.

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________
4. Test your solution.

- Does your creature have at least five plane shapes? ☐ YES ☐ NO
- Does your creature have at least three solid shapes? ☐ YES ☐ NO
- Does your creature have two parts that use levers, pneumatics, or pulleys to move? ☐ YES ☐ NO
- Does your creature stand by itself for at least five minutes? ☐ YES ☐ NO
- Does your creature remain standing when its parts are moving? ☐ YES ☐ NO
- Is all of your work colorful and neatly done? ☐ YES ☐ NO
Guided Portfolio—5
Name ________________________________

5. **Evaluate your solution.**
Was it the best solution? Would one of your other ideas have been better? Why or why not?

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

What would you have done differently?

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

Could you add to it to make it better? What would you add to it?

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________
Guided Portfolio—6
Name __________________________

Attach a photograph of your final project here. If you do not have a photograph, draw a picture of your final project.

How would you make your project better? Draw a picture showing how it would look after you have made changes to it.

**Standards of Learning**

**English (2002)**

*Oral Language*

3.1   The student will use effective communication skills in group activities.
   a) Listen attentively by making eye contact, facing the speaker, asking questions, and summarizing what is said.
   b) Ask and respond to questions from teachers and other group members.
   c) Explain what has been learned.

3.2   The student will present brief oral reports.
   a) Speak clearly.
   b) Use appropriate volume and pitch.
   c) Speak at an understandable rate.
   d) Organize ideas sequentially or around major points of information.
   e) Use clear grammatically correct language and specific vocabulary to communicate ideas.

**Reading**

3.4   The student will use strategies to read a variety of fiction and nonfiction materials.
   a) Preview and use text formats.
   b) Set a purpose for reading.
   c) Apply meaning clues, language structure, and phonetic strategies.
   d) Use context to clarify meaning of unfamiliar words.
   e) Read fiction and nonfiction fluently and accurately.
   f) Reread and self-correct when necessary.

**Science (2003)**

*Scientific Investigation, Reasoning, and Logic*

3.1   The student will plan and conduct investigations in which
   a) predictions and observations are made;
   b) objects with similar characteristics are classified into at least two sets and two subsets;
   c) questions are developed to formulate hypotheses;
   d) volume is measured to the nearest milliliter and liter;
   e) length is measured to the nearest centimeter;
   f) mass is measured to the nearest gram;
   g) data are gathered, charted, and graphed (line plot, picture graph, and bar graph);
   h) temperature is measured to the nearest degree Celsius;
**Science (2003) continued**

**Scientific Investigation, Reasoning, and Logic**
- i) time is measured to the nearest minute;
- j) inferences are made and conclusions are drawn; and
- k) natural events are sequenced chronologically.

**Force, Motion, and Energy**
3.2 The student will investigate and understand simple machines and their uses. Key concepts include
- a) types of simple machines (lever, screw, pulley, wheel and axle, inclined plane, and wedge);
- b) how simple machines function;
- c) compound machines (scissors, wheelbarrow, and bicycle); and
- c) examples of simple and compound machines found in the school, home, and work environment.

**Mathematics (2001)**

**Measurement**
3.14 The student will estimate and then use actual measuring devices with metric and U.S. Customary units to measure
- a) length–inches, feet, yards, centimeters, and meters;
- b) liquid volume–cups, pints, quarts, gallons, and liters; and
- c) weight/mass–ounces, pounds, grams, and kilograms.

**Geometry**
3.18 The student will analyze two-dimensional (plane) and three-dimensional (solid) geometric figures (circle, square, rectangle, triangle, cube, rectangular solid [prism], square pyramid, sphere, cone, and cylinder) and identify relevant properties, including the number of corners, square corners, edges, and the number and shape of faces, using concrete models.

**Standards for Technological Literacy**
- Standard 8: Students will develop an understanding of the attributes of design.
- Standard 9: Students will develop an understanding of engineering design.
- Standard 10: Students will develop an understanding of the role of troubleshooting, research and development, invention and innovation, and experimentation in problem solving.
- Standard 11: Students will develop the abilities to apply the design process.
